

DataScribe Management & Analysis Software

WinDataSoft 2

Effortless Operation

WinDataSoft 2 is built on our 10 years experience. This easy to use Windows NT/95/98 package provides the advanced features you've requested. From our Internet "instant upgrade" support to its built-in calculations, WinDataSoft sets a new standard for productivity and ease of use! Need to fax a graph? A single click will convert it from color to monochrome with symbols. Tired of having to restart your logger after every data retrieval, and the multiple files, or lost data this can cause? Our systems retrieve the data without interrupting the logger. Whether you work in degrees F or C, global scale settings insure it works the way you do. We designed WinDataSoft to solve problems not create them!

Advanced Capabilities

WinDataSoft 2 allows unlimited multiple plots on the same graph. You can add graph annotations and save them with the data file. It gives you complete control over scales, graph properties, and selected calculations. Save the setup you like as a custom configuration, then apply it to any other data file with single click ease! WinDataSoft 2 works hand-in-glove with our pocket-portable Transporter data shuttle allowing fast, effortless data retrieval and logger management in the field, or on the docks. WinDataSoft 2 and our DataScribes are fully Year 2000 compliant.

Powerful Calculations Built-in

With WinDataSoft there's no need to struggle with exports and spreadsheets! *Our software is the only one that includes the most desired calculations and treats them just like any sensor!* Just go to the display pick-list and select the calculations you want to add. If any additional information is needed to perform the calculation enter it in the window that appears, then click "Ok". A plot of the results is added to the graph. If you browse or export the data, the calculated values are included. It doesn't get any easier, or more accurate!

A complete status report is displayed for every logger or data file!

Multiple graphs and complete control of all graph properties, including scales, is a snap!

Selecting the calculations and sensors to graph is effortless using our display "pick-list"!

Logger setup is a breeze using easily navigated dialogs!

Manual scale control lets you graph & analyze only selected data!

Alarm features are easily configured in WinDataSoft!

Calculation Dialogs

Many of the advanced calculations built into WinDataSoft 2 require additional information such as user selectable thresholds, atmospheric pressure, and the like. Shown below are a few of the many calculation dialogs. For a complete listing of the included calculations and their formulas visit our Web site.

Chill hours track the total hours below a temperature.

Growing degree-days are used to track the development of an organism. We include 10 methods!

Mildew index is used in viticulture and agriculture. WinDataSoft includes the most used methods.

Stores, museums and pharmacies use shelf life and permanence index to manage perishables and archives.

No Risk

Prove to yourself that a DataScribe system is the perfectly affordable solution for your application. Take advantage of our 30 day satisfaction guarantee. If you're not completely satisfied for any reason return it for a complete refund. Visit our Web site at <http://www.avatel.com> or give us a call at (707) 961-1016

Compare our WinDataSoft 2 to Onset's BoxCar Pro 3.0

Feature	WinDataSoft	BoxCar
Year 2000 compliant	Yes	Yes
Automatic unit identification	Yes	No
Data retrieval stops logger	No	Yes.
Context sensitive help	Yes	No
Allow user sensor calibration	Yes	No
Delay of alarms & min/max	Yes	No
Date/Time customization	No	Yes
Export graph to bitmap	Yes	Yes
Export data to Excel, 123	Yes	Yes
Export daily min/maxs	Yes	No
Browse daily min/max data	Yes	No
Customize graph properties	Yes	Limited
Plot with symbols	Yes	Yes
Overlay multiple graphs	Yes	No
Automatically set scales	Yes	Yes
Set scales manually	Yes	No
Graph annotations	Yes	No
Save annotations with data	Yes	No
Save/Restore graph settings	Yes	No
Create custom configurations and apply to any file	Yes	No
Internet install & upgrades	Yes	No
Built-in Calculations	Yes	Limited
Calculations plotted w/ data	Yes	No
Calcs treated like sensors	Yes	No
Calculate Dew Point	Yes	Yes
Calculate Wet Bulb	Yes	No
Calculate Abs Humidity	Yes	Yes
Calculate Comfort Index	Yes	No
Calculate degree-days	Yes	No
Calc growing degdays	Yes	No
Calculate Mildew Index	Yes	No
Calc Wood Equil. Moisture	Yes	No
Calculate Chill Hours	Yes	No
Calculate Shelf Life	Yes	No
Calculate permanence index	Yes	No
Calc mean kinetic temp.	Yes	No
Create custom calculations	Yes	No
